- On-site digital X-rays & MRI at Wooster office
- Wooster Ambulatory Surgery Center (WASC) adjacent to Wooster office
- Serving the community for over 40 years
- Trusted by more than 200 area physicians

Dear patients,

As you may have heard, I had a stroke in August. As a result, I was on medical leave for six months concentrating on my rehabilitation. Initially, I struggled with my speech, balance and stamina. My cognitive skills and clinical judgement have remained intact but unfortunately, I am still left with a speech impairment

I resumed seeing patients on a limited basis in March. In addition, I began working with my partners and assisting them in surgery. While under their direct supervision, I am pleased to report that they agree that my surgical skills are up to the high standards expected at Wooster Orthopaedics and Sports Medicine.

As always, our main concern at Wooster Orthopedics and Sports Medicine is that our patients receive personalized and quality orthopaedic care. Along those lines, if at any point you do not understand your diagnosis and treatment plan please do not hesitate to ask either myself or one of my assistants for a better explanation. We are here for you and if, for any reason, you aren't comfortable or happy with your care please do not hesitate to tell us and we will make it right. Our main objective is quality orthopedic care.

I want to thank my colleagues, the staff at WOSMC and most of all you, my patients, for everyone's patience and understanding during this difficult process.

Thank you,

Michael S. Knapic, D.O.
