- On-site digital X-rays & MRI at Wooster office
- Wooster Ambulatory Surgery Center (WASC) adjacent to Wooster office
- Serving the community for over 40 years
- Trusted by more than 200 area physicians

Dear Patients,

As you may have heard, I had a stroke in August 2017. As a result, I have been out of the office since then. Early on, I struggled with my speech, poor balance and stamina. While I have regained most of my strength, struggles with my speech remain. Because my clinical judgment is sound, I am pleased to report that I have recently been authorized to return to work to see patients in the office and to assist others in performing surgery in order to get back into the swing of things. In anticipation of my return, I wanted to share with you my situation and ask for your patience and understanding as we meet these challenges.

As always, a quality experience and quality care for you, the patient, is our main concern at Wooster Orthopaedics and Sports Medicine. To make sure that the care you receive meets the high standards we set for ourselves, I anticipate that I will have a reduced schedule so that I can spend an appropriate amount of time communicating with patients who have been kind enough to wait to see me in the office. Along those lines, if at any point you do not understand your diagnosis and treatment plan, please do not hesitate to ask either myself or one of my assistants to repeat it. We are here for you and if, for any reason, you aren't comfortable or happy with your care please do not hesitate to tell us and we will make it right.

Our main objective is quality orthopedic care for you. I will continue to be surrounded by my partners and our outstanding staff in order that we make sure that your care is the focus of every visit with us. I am truly looking forward to seeing you all.

Thank you,

Michael S. Knapic, D.O.
